NovaDAO

Market-Governed Organizations on Stellar

Pitch to Stellar Development Foundation — March 2026

THE PROBLEM

Crypto Fundraising is Broken

Insider Favoritism

VCs and insiders get preferential access, leaving retail investors behind

Structural Price Pressure

Low float / high FDV launches create inevitable sell pressure from token unlocks

Rug Pulls & Fraud

No accountability mechanisms — teams can vanish with raised funds

Voter Apathy

Traditional DAO governance sees <5% participation rates on critical proposals

THE SOLUTION

NovaDAO

A fundraising and governance platform that uses prediction markets (futarchy) to make better decisions — built on Stellar.

Fair Launch ICOs

Open participation, equal pricing, community-first distribution with rug protection

Market Governance

Prediction markets replace voting — financial incentives ensure better decisions

Legal Alignment

IP, treasury, and token minting governed by markets — teams can't extract value

HOW IT WORKS

Fundraising Flow

01

Raise XLM

Anyone can participate over 4 days at equal pricing. If the raise doesn't hit minimum, everyone gets refunded automatically.

02

Spend Responsibly

Teams receive monthly budgets. Larger expenditures and new token issuance require approval from decision markets.

03

Win Together

Legal structuring aligns tokenholders and teams. Market oversight over IP and revenue links the business to the token.

Futarchy: Bet on Beliefs

For each proposal, two conditional markets are created. Traders put real money behind their predictions.

PASS Market

Traders buy PASS tokens if they believe the proposal will **increase** the project's token value.

$1.24
PASS price

FAIL Market

Traders buy FAIL tokens if they believe the proposal will **decrease** the project's token value.

$1.08
FAIL price

If PASS trades 3%+ higher than FAIL (TWAP), the proposal auto-executes. No voter apathy. Pure market signal.

WHY STELLAR?

Built for Stellar

5s

Finality

Transaction confirmation in seconds, not minutes

~$0

Fees

Near-zero fees (~0.00001 XLM) enable frequent trading

DEX

Built-in

Native order book DEX — perfect for prediction markets

SCP

Consensus

Stellar Consensus Protocol — energy efficient & secure

Powered by Soroban smart contracts — Stellar's Rust-based VM for complex on-chain logic

MARKET OPPORTUNITY

Massive TAM

$24B+
DAO Treasury Assets (2025)

$55B+
Prediction Market Volume (2025)

300+
DAOs on Stellar Ecosystem

Solana vs Stellar Ecosystem

	Solana	Stellar
Futarchy Platform	MetaDAO ($33M+)	**NovaDAO (First!)**
Avg. Tx Fee	$0.02 - $0.05	**$0.000001**
Settlement Time	~400ms	~5 seconds

TRACTION

Validated by MetaDAO

MetaDAO on Solana has proven futarchy governance works. We bring this model to Stellar.

$33M+	10	100+	2023
Total Raised	Projects Launched	Proposals Resolved	Live Since

NovaDAO Status

Platform design & architecture complete	Done
Soroban smart contract development	In Progress
Community building — 2,500+ early waitlist	Active
3 founding projects in pipeline	Confirmed

REVENUE MODEL

Sustainable Revenue

2-3%

Platform Fee on Raises

Percentage of funds raised through NovaDAO ICOs goes to the platform treasury

0.5%

Trading Fees

Small fee on every decision market trade — conditional PASS/FAIL token swaps

SaaS

Futarchy-as-a-Service

White-label futarchy governance for other Stellar DAOs and protocols

Projected Year 1 Revenue: $800K–$1.5M (based on $30M+ platform volume)

COMPETITIVE LANDSCAPE

First Mover on Stellar

Feature	NovaDAO	MetaDAO	Snapshot	Aragon
Chain	**Stellar**	Solana	Multi-chain	Ethereum
Futarchy	**✓ Yes**	✓ Yes	✗ No	✗ No
Fundraising	**✓ Yes**	✓ Yes	✗ No	✓ Yes
Tx Fees	**~$0**	$0.02+	Free (off-chain)	$2-10+
Settlement	**5 seconds**	400ms	Off-chain	12+ seconds
Native DEX	**✓ Yes**	No (Openbook)	N/A	✗ No

ROADMAP

Execution Plan

Q2 2026

Foundation

- Soroban contracts audit
- MVP launch
- First test raise

Q3 2026

Growth

- Public platform launch
- 3 founding projects
- Decision market V2

Q4 2026

Scale

- FaaS rollout
- 10+ projects live
- Institutional partners

2027

Expand

- Cross-chain bridges
- Mobile app
- Global anchors

The Team Behind NovaDAO

CEO

[Your Name]

CEO & Founder

Ex-DeFi Protocol Lead
8+ years in blockchain

CTO

[CTO Name]

CTO

Soroban Core Contributor
Ex-Stellar Core Team

R&D

[Research Lead]

Head of Research

Futarchy & Governance Expert
PhD Economics

BD

[BD Name]

BD Lead

Stellar Ecosystem Partnerships
Ex-SDF Programs

THE ASK

Partnership with SDF

$500K

Grant Request

Development Grant

$500K to fund 12 months of smart contract development, audits, and team expansion

Ecosystem Support

Featured listing on Stellar ecosystem page and co-marketing with SDF channels

Technical Partnership

Direct access to Soroban team for integration support and protocol optimization

Launch Support

Joint announcement, event sponsorship, and introductions to Stellar anchors

Thank You

Let's build the future of decentralized governance on Stellar.
